

Report Euro Cup F3D 2013.

Three Euro cup competitions were held in Siziano (I), Melnik (CZ), and Tours (FRA), which had 64 competitors. The Euro cup was won by Carlo Perella from Italy, 2nd Tomas Andriik from Czech Republic, 3rd Roberto Cavallaro from Italy, 4th Ray van de Klok from the Netherlands and 5th Marcel Huisman from the Netherlands.

Results are appended to this report.

A (not fully systematic) analysis of ground impact positions was carried out during 2 of the Euro Cup competitions. The earlier data were confirmed, with no crashes in the safety areas.

From these data there is no reason to modify the safety areas in the rules. This is as well for the pilots area as for the pits and judges positions and also for the spectators areas.

The definition of safe landing and emergency landing areas by the CD before the start of a competition is common practice now in all Euro Cup events.
