2007 Report

The F3C R/C Helicopter Subcommittee (S/C) has 18 members. After the March Plenary meeting, Antonis Papadopoulos from Greece was replaced by Evangelos Paschaloudis.

The following documents were circulated via email:

- 1) Request for final approval of S/C 2007 F3C proposals (Feb 11)
- 2) S/C Voting results (Mar 1)
- 3) Letter stating that 2.4 GHz R/C systems are allowed at WC in Poland (Mar 26)
- 4) Updated F3C S/C Membership list (Apr 7)
- 5) 2007 Technical Meeting report & final text for paragraph 5.4.11 (Apr 20)
- 6) Additional Fuel choices available at WC in Poland (May 13)
- 7) One submitted proposal for 2008 (Nov 12)
- 8) 2007 WC FAI Jury report (Nov 18)

The discussions within the F3C S/C during the past few months focused on the dissatisfaction encountered with the "500" normalization system at the World Championship in Poland. The 2008 proposal requests that we return to the "1000" normalization system that was used for twelve years prior to the 2005 World Championship. It is the desire of the S/C to use the "1000" system at the 2008 European and Asian Continental Championships. A scoring analysis was performed on the results for the 2007 World Championship and no significant national bias on the part of any of the judges was observed.
